# Bollard ANPR Camera

Commercial  
ANPR

## ASOA-18Z11-A66

Paragon Security's bollard ANPR cameras are robust units design to provide maximum camera protection at optimal camera height – ideal for automatic entry systems. They are available in standard or dual (with wide angle overview camera) versions. The unit comprises our standard ANPR camera mounted in a traffic bollard.

To grant access for the correct vehicle, the anpr camera must view the first vehicle in the queue. This can be very difficult with a pole-mounted

The full height rear access door (with key lock) simplifies both installation and maintenance.

The bollard camera is vandal resistant and available in a variety of colours.

The camera includes:

- Adjustable sunhood
- Base mounting plates
- Two keys
- Camera power supply (230v ac to 24V ac 1A)

## Features

- High performance ANPR camera with optical zoom lens
- Perfect plate illumination under all lighting conditions
- Optical filtering and fully adjustable pulsed infrared LED illumination
- Ultra-fast 1/10,000th second shutter speed freezes plates at any vehicle speed
- Instant setup with motorised adjustment of zoom and focus
- Dual version includes a colour overview camera
- Vandal-resistant cabinet with full height lockable rear door
- Rotating cabinet with base clamp for easy pan adjustment
